Digital Literacy Quiz

In an era where technology moves faster than ever, being "tech-savvy" isn't just an advantage—it's a necessity. This quiz evaluates your ability to navigate, evaluate, and communicate information across various digital platforms. From cybersecurity basics to identifying AI-generated content, see how prepared you are for the future of work.

Which of the following is the most secure practice when creating a password for an online account? * 10 points

- Writing them all down in a notebook kept next to your computer.
- Using a unique, complex password for every account and storing them in a password manager
- Using "Password123" but changing the last number every month.
- Using your phone number so you never forget it.

You receive an email from "Support-Tech" saying your account has been compromised and you must click a link to log in immediately. The sender's email address is security-check@gmail.com. What should you do? * 10 points

- Click the link immediately to secure your account.
- Reply to the email asking for proof of the hack.
- Delete the email and log in via the official website's known URL.
- Forward it to all your friends to warn them.

When reading an online article, which of the following is a strong indicator that the information is credible? * 10 points

- The article has thousands of "likes" and "shares" on social media.
- The headline is written in all capital letters with many exclamation marks.
- The author provides citations, data sources, and links to verifiable research.
- The website has a lot of bright, flashing advertisements.

What does it mean when a file is stored "in the cloud"? * 10 points

- It is saved on a physical hard drive inside your computer.
- It is stored on remote servers accessed via the internet.
- It is stored in a satellite orbiting the Earth.
- it is only accessible when the weather is clear.

What is a "digital footprint"? * 10 points
